

## TEXT MESSAGING

### 5 Text Marketing, Promotions, or Group Messaging

Group text messaging designed to deliver a text message to any size group from 1 to 100,000. Easy opt-in and opt-out feature, dedicated 10-digit phone number with a local area code and easy list administration. Used for text marketing purposes, one-way group communications, or informational reminders. "One Call Reach Them All".

### 6 Text Message Contests

Txt-2-Win gives you the ability to create and automate text contests. With Txt-2-Win you can choose the contest length, create rules for the number of times a contestant can enter, create custom contest keywords, create custom responses and set other parameters. Create a winning text message that can be sent manually or automatically based on the rules you set.

### 7 Mass Text Messaging - API Available

Designed to send text messages to large contact lists with individualized message parameters. Bulk Text works much like a mail merge in a .CSV (Excel) format. Contact lists are uploaded and converted to a text format and sent out to clients at a predetermined day and time. An auto-reply feature is also available for targeted keyword campaigns. All Message batch sends are logged and tracked.

### 8 TxtMyLink for Business

Provide information to your customers or guests easily through Text Message. When a customer or guest sends your predetermined "keyword" to your unique phone number we provide to you, the sender is sent an auto-response with specific information or a hot-link to a pre-designated website or website location. Smartphone and tablet users can click directly on any link to easily access the information and have it at their fingertips for continued reference.

### 9 GPS locator feature now available! For more information and a free demo, contact your sales representative.

### 10 API Available

Easily integrate Texting into your software or system. Contact your sales representative for more information. It's easy and affordable.

### 11 AI Chat Bots

- Build your conversation to meet your business needs
- The Intelligent Chat Bot will learn from your customer conversations
- Connect through an API to provide your customers real access to their account information
- Reduce calls for information and answer questions 24/7/365.
- Conversations in multiple languages

97% of American adults have a cell phone

98% of text messages are read and responded to within 90 seconds

2.12 trillion text messages are sent / received per year
